OCHA BURKINA FASO · INFORMATION MANAGEMENT & PUBLIC INFORMATION

Media monitoring — quick guide to the demo

A tool built for the OCHA Burkina Faso Public Information (PI) team: it collects the press every hour, an AI pre-sorts and summarises, PI validates, and the weekly media review is ready to send.

HOW IT WORKS

1 · Collect
Every hour, from 26 sources: national press (RSS), Google News searches, regional/international outlets, ReliefWeb, FEWS NET, WHO.

2 · Clean
Direct publisher links, the same story from several outlets grouped as one, publication dates checked, article text read.

3 · AI sort
3 times a day: relevant or not, importance score, one of PI's 5 sections, short factual summary.

4 · PI review
PI marks each article ✓ Retain or ✕ Discard. The AI learns from these choices.

5 · Weekly review
Saturday → Friday, in PI's usual format: copy into Outlook, or download Word / CSV.

TRY IT IN 5 MINUTES

1. **Articles to sort.** Start with ★ **Must read** (the 10 highest-scored stories). Click ✓ Retain or ✕ Discard; click again to undo. Change the section with the drop-down, or click a summary to edit it. The tag *summary from title only* means the article text could not be read (paywall, blocked site).
2. **Discard the rest.** At the bottom of the list, two clicks move everything not retained to **Discarded** — nothing is lost, it can be rescued from that tab.
3. **Not proposed.** Articles the AI judged irrelevant. Retaining one here teaches the sort that it missed something.
4. **Weekly summary.** The retained articles laid out in the 5 sections. Reorder with ↑ ↓, edit any summary, then **Copy for Outlook** (paste straight into an e-mail), ⬇ **Word** or ⬇ **CSV** (opens in Excel). Use the week selector to see the example week of 17–23 October.
5. **Sources.** Add a source with an RSS feed address or Google News keywords (e.g. `site:aib.media`), and switch sources on or off.
6. **Start again** at any time with ↻ **Reset demo**; switch the language with **FR | EN** (yellow banner).

THE DEMO VS. THE REAL TOOL

This demo

- No login. Real articles collected and sorted on 29 October 2026 (fixed snapshot).
- Your changes stay in your own browser and are not shared. Only anonymous usage counts are recorded (time zone, parts of the demo used) — no names or e-mails.
- English titles and summaries are machine-translated for the demo.
- New sources are not actually read; the AI sort does not run.

The real tool

- Personal login with a UN e-mail (link sent by e-mail); access by role.
- Collection every hour, AI sort and summaries 3× a day; decisions shared by the PI team.
- Works in French, the language of the Burkina press and of PI's product.
- Retained articles also feed OCHA Burkina Faso's data platform (HumanBase questions, management dashboard).

Sections used (from PI's weekly e-mail): National perspectives / General news · Bilateral cooperation / Regional / International perspectives · Humanitarian perspectives / UN · Opinions / Analysis · International.

Built by the OCHA Burkina Faso Information Management Unit with the PI team. Questions or a walkthrough: Assefa Yewondwossen, Information Management Officer — assefa10@un.org.
